Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-46 (Cancelled).

47. (Currently Amended) A vehicle stabilizer bar system comprising:

at least one vehicle stabilizer bar; and

an actuator comprising:

an output member;

an electric motor operatively coupled to said output member for moving said output member from a first position to a second position upon energization of said electric motor by a power source, said vehicle stabilizer bar being responsive to said output member such that vehicle stabilizer bar is in a first stabilizer bar ~~position~~ state when said output member is in said first position and is in a second stabilizer bar ~~position~~ state when said output member is in said second position; and

at least one electrical energy storage element coupled to said electric motor, said electrical energy storage element being configured for energizing said motor to move said output member from said second position to said first position upon interruption of power from said power source to said motor.

48. (Previously Presented) The system of claim 47, wherein said output member comprises a plunger.

49. (Previously Presented) The system of claim 47, wherein said electric motor comprises a drive shaft, and wherein said electric motor is operatively coupled to said output member through a gear train coupled to said drive shaft.

50. (Previously Presented) The system of claim 47, wherein said electrical energy storage element comprises a capacitor.

51. (Previously Presented) The system of claim 50, wherein said capacitor has a value of at least one Farad.

52. (Currently Amended) The system of claim 47, wherein said first stabilizer bar ~~position~~ state is an engaged ~~position~~ state of said stabilizer bar and said second stabilizer bar ~~position~~ state is a disengaged ~~position~~ state of said stabilizer bar.

53-66 (Cancelled).
